

CS4116 Group 4: Progress Report - Week 07

Kevin:

Week 06 Report:

- Tidied up back end stuff with design document, making sure database tables were correct and adding in more processes
- Setup pipeline so as when our code is merged to main after a code review, the changes will reflect on our infinity free website
- Got demo for team on how to run database locally for testing.
- Login functionality setup with base template for each project

Week 07 Plan:

- Continue to work on pages focusing on getting matches backend done
- Fix server issue displaying website

Adam:

Week 06 Report:

- Submitted Design Document with team's approval.
- Worked with backend on where to begin frontend development
- Worked with frontend to divide the workload evenly.
- Begun frontend development of home page.

Week 07 Plan:

- Complete frontend development of the home page.
- Work with backend to make the home page fully functional.
- Plan with frontend and backend on what pages to develop next.

Caoimhe:

Week 06 Report:

- Made up mobile phone mockups to show application responsiveness for design document
- Planned with backend where to start frontend development
- Set up local database with Kevins help
- Started frontend development on login page

Week 07 Plan:

- Finish frontend development on login and sign in pages
- Plan with backend next steps for other pages

Olan:

Week 06 Report:

- Tidied up back end stuff with design document, making sure database tables were correct and adding in more processes
- Setup pipeline so as when our code is merged to main after a code review, the changes will reflect on our infinity free website
- Got registration functionality complete with checks such as password length, if email is already associated with an account and if the mail is a ul student mail.
- Database working locally so as if a account is registered successfully a http request is sent to db which updates with correct information

Week 07 Plan:

- Finish up on registration page with backend (more error checking, running proper functional tests on it, adding in terms and conditions popup to view and accept)
- Start work on more backend functionality for different pages, we will meet later in week to discuss actual planned pages to do
